

## The Gas Cooker Converter

- (a) Print on thick paper (120g) and carefully cut out the shapes below.
- (b) Fold the scale in half and glue together, so that the scale is visible.
- (c) Fold the strip of paper along on the lines and then glue the top flap onto the strip so that it forms a loop.
- (d) Slide the loop onto the scale. You will be able to convert temperatures by aligning the edge of the strip with the temperatures.
