

## The Weight Converter

- (a) Print on thick paper (120g) and carefully cut out the shapes below.
- (b) Fold the scale in half and glue together, so that the scale is visible.
- (c) Fold the strip of paper along on the lines and then glue the top flap onto the strip so that it forms a loop.
- (d) Slide the loop onto the scale. You will be able to convert weights by aligning the edge of the strip with the weights.

1 kilogram = 2.20462262 pounds

1lb = 0.45359237kg
