

SQUARES CAPTURE

A two player game to capture squares.

Players take it in turns to draw either a vertical or a horizontal line.

When a square is completed, it is captured and the player writes their initials into the square.

The winner is the player who has captured the most squares when there are no more lines to be drawn.

Each coloured square captured counts as TWO squares.

It may be worth each player using a different coloured pen or pencil.

Player 1..... Player 2.....
